Bloom

Financial Summary — Executive Review

Delhi NCR launch · Bare-minimum bootstrap model

Prepared: September 2026

All figures illustrative planning estimates, not audited

AT A GLANCE

The Four Numbers That Matter

Rs. 55L

Recommended seed raise

Rs. 35.2L

Modeled Year 1 burn

Month 10

Monthly cash-flow breakeven

7

Core team by year-end

Bloom needs **Rs. 55 lakh** to launch and run through Year 1 in Delhi NCR. The model itself only requires Rs. 35.2 lakh — the rest (Rs. 19.8L, a 56% cushion) is buffer for the fact that real launches almost always run slower than the plan. Monthly cash flow turns positive around Month 10-11; the core team stays lean throughout, growing from 3 people at launch to just 7 by year-end.

Year 1 vs. Year 2 vs. Year 3 — One Line Each

Year	Net Result	What's Happening
Year 1	(Rs. 35.2L)	Launch burn — building the team, app, and first NCR partner network.
Year 2	(Rs. 50.4L)	Bigger absolute burn funding 1-2 new city launches — but revenue is 8x Year 1.
Year 3	+Rs. 2.74Cr	Model turns profitable as Tier-1 expansion scales — treat as upside case, not the plan.

Cumulative capital required from Day 1 through the low point: **Rs. 85.6 lakh** (end of Year 2), before Year 3's modeled profit brings the cumulative position positive.

THE ASK

Investment Required & Use of Funds

Why Rs. 55 Lakh

Component	Amount	Notes
One-time pre-launch cost	Rs. 17.3L	App + website build, legal, branding, initial inventory, office setup
Year 1 recurring operating burn	Rs. 17.9L	12 months of team, rent, marketing, training, insurance — net of gross profit earned
Modeled Year 1 Total Burn	Rs. 35.2L	The bare minimum to survive Year 1
Safety buffer	Rs. 19.8L (56%)	Cushion for a slower ramp — never assume a plan lands exactly on schedule
TOTAL SEED RAISE	Rs. 55.0L	Keeps cash balance positive all year — lowest point is Rs. 16.6L (Month 10)

Where It Goes (% of Total Gross Spend, Year 1)

Working Capital		40% · Rs. 34.4L
Team		30% · Rs. 26.0L
Product & Tech		17% · Rs. 14.5L
Marketing		13% · Rs. 11.4L

"Working Capital" covers rent, partner training, insurance, consumable kits, legal, branding, initial inventory, office setup, and contingency — everything outside the three named categories above. These percentages are of total gross spend (Rs. 86.4L); the seed raise covers this gross spend less the Rs. 51.2L in revenue Bloom itself earns during the year, plus the safety buffer.

THE PLAN

Year 1, Month by Month

Month	Bookings	Team	Net Cash Flow	Cash Balance
M1	-	3	(Rs. 19.5L)	Rs. 35.5L
M2	-	4	(Rs. 2.6L)	Rs. 32.8L
M3	250	4	(Rs. 2.8L)	Rs. 30.0L
M4	450	5	(Rs. 3.1L)	Rs. 26.9L
M5	700	5	(Rs. 2.7L)	Rs. 24.3L
M6	1,000	6	(Rs. 2.6L)	Rs. 21.7L
M7	1,400	6	(Rs. 2.3L)	Rs. 19.5L
M8	1,850	7	(Rs. 1.8L)	Rs. 17.6L
M9	2,350	7	(Rs. 1.0L)	Rs. 16.6L
M10	2,900	7	(Rs. 0.1L)	Rs. 16.6L
M11	3,500	7	+Rs. 1.0L	Rs. 17.6L
M12	4,200	7	+Rs. 2.2L	Rs. 19.8L

Reads: bookings ramp from a soft launch (Month 3, ~250 bookings) to 4,200/month by year-end. Net cash flow crosses positive in Month 11. Cash balance never goes below Rs. 16.6L, assuming the full Rs. 55L is raised upfront — that's the real test of whether the raise is sized correctly.

Hiring Ramp — Bare Minimum Only

Month	Role Added	Team Size
1	Founder + Ops & Partner Lead + Finance (retainer)	3
2	+ Support & Hyperlocal Marketing Lead	4
4	+ Tech / App Maintainer (app ships, agency hands off)	5
6	+ Training & Quality Lead	6
8	+ Ops Associate #2 (second NCR zone)	7
