

BLOOM

AT-HOME SALON & BEAUTY SERVICES PLATFORM

Software Requirements Document

Phase 1 Scope: Salon & Beauty Home Services Only

Prepared for: IT Delivery Team

Version 1.0 · Draft for Internal Review · September 2026

CONFIDENTIAL — INTERNAL USE ONLY

Document Control

Version	Date	Prepared By	Description
1.0	September 2026	Business / Product Team	Initial draft — full module-wise functional requirements for IT scoping and estimation.

Table of Contents

1. Purpose & Objective

This document is the master functional requirements reference for the Bloom at-home salon & beauty services platform. It is intended for the IT / engineering delivery team to scope, estimate and plan build-out across three client applications — an Android app, an iOS app and a website — supported by a Partner App and an Admin Web Console, so that every module required for a full at-home salon and beauty booking marketplace is accounted for before sprint planning begins.

The platform is modeled on the proven operating pattern of category leaders in India's at-home beauty services market — principally Urban Company and Yes Madam — and is deliberately scoped to Phase 1: salon & beauty home services only, consistent with the phased-expansion approach already agreed for this business.

2. Scope

2.1 In Scope

- Three client-facing applications: Customer Android App, Customer iOS App, and a public Website.
- A dedicated Partner App (Android & iOS) for the service-professional persona.
- An Admin Web Console (back-office) for the administrator persona.
- Three personas: End Customer, Partner (service professional), and Administrator.
- The full salon & beauty service catalog: hair, skin & face, hair removal, nails, makeup, men's grooming, body care (beauty-adjacent), and bundled packages.
- MIS and reporting requirements, including profitability, inventory / SKU, partner, marketing and finance reports.
- Non-functional requirements: security, compliance, performance and third-party integrations.

2.2 Out of Scope (This Document)

- Wellness, spa, Ayurvedic and fitness categories — planned for Phase 2 and beyond, per the phased expansion roadmap.
- White-label B2B licensing of the platform to other brands, and the curated luxury marketplace tie-up model.
- Broader home services (cleaning, appliance repair, home maintenance) and geographic expansion beyond the initial launch city.
- Detailed, screen-by-screen user workflows, user journeys and UX flow diagrams — intentionally excluded at this stage. As agreed, these will be discussed and documented separately once the module structure in this document is reviewed and signed off.

3. Business Context

The at-home salon and beauty segment in India has moved from an informal, trust-poor market into a venture-scale, increasingly profitable category, led by platforms that solved hygiene risk, inconsistent quality and opaque pricing through verified professionals, sealed single-use consumables and transparent upfront pricing. This platform adopts the same trust-first operating model, applied to a single, tightly-scoped category — salon & beauty — before any future category expansion.

Because the commercial model depends on commission, private-label product sales, training fees and (later) membership revenue, the technical scope in this document treats service catalog / SKU management, partner lifecycle management, and MIS reporting as first-class modules, not administrative afterthoughts.

4. Personas

4.1 End Customer

The NCR household or individual booking at-home salon & beauty services. Primary needs: fast discovery, transparent pricing, a verified and trackable partner, and a reliable feedback / redress mechanism.

4.2 Partner (Service Professional)

The certified beauty professional who accepts and fulfils bookings in customers' homes. Primary needs: a steady, fairly-matched stream of jobs, transparent earnings, and a safe, supported working experience.

4.3 Administrator

The internal operations, finance, marketing and quality team managing the platform end-to-end. Primary needs: full control over catalog, pricing, dispatch, partner lifecycle, inventory and reporting, with role-appropriate access.

5. Platform & Application Landscape

The three requested client applications map to the three personas as follows. An Admin Web Console and a Partner App are included as the standard architecture needed to serve the Administrator and Partner personas alongside the requested apps.

Application	Type	Primary Persona(s)	Purpose
Customer Android App	Native Android	End Customer	Discover, book and manage at-home salon & beauty services.
Customer iOS App	Native iOS	End Customer	Same as above, for iOS users.
Public Website	Responsive web	End Customer + prospective partners	Marketing, booking, and the partner-recruitment landing page.
Partner App	Android & iOS	Partner	Accept jobs, navigate, execute service, track earnings and manage kits.
Admin Web Console	Internal responsive web	Administrator	Manage catalog, pricing, dispatch, partners, inventory and MIS.

Note: Confirm the Partner App and Admin Web Console scope with the IT team before sprint planning — they are necessary to deliver the Partner and Administrator personas requested, in addition to the three platforms named.

6. Module Overview — Executive Summary

The platform is organized into 33 modules across five functional categories, totalling 156 individual requirements at task level. The full task-level breakdown, with persona, platform, lifecycle stage and priority tagging for sprint planning, is provided in the companion workbook (Bloom_Salon_Platform_Module_Requirements.xlsx).

Customer-Facing Modules (12 modules)

ID	Module Name	Priority	Requirements
M01	Customer Onboarding & Profile Management	P0	6
M02	Address & Location Management	P0	5
M03	Service Catalog, Search & Discovery	P0	6
M04	Booking, Scheduling & Slot Management	P0	6
M05	Cart, Pricing, Offers & Coupons	P0	5
M06	Payments, Wallet & Refunds	P0	6

ID	Module Name	Priority	Requirements
M07	Live Order Tracking	P1	5
M08	Ratings, Reviews & Feedback	P0	4
M09	Membership & Subscription Plans	P1	4
M10	Loyalty, Referral & Rewards	P1	4
M11	Customer Support, Complaints & SOS	P0	5
M12	Reschedule, Cancellation & Service Guarantee	P0	4

Partner-Facing Modules (7 modules)

ID	Module Name	Priority	Requirements
M13	Partner Recruitment & Application	P0	4
M14	Partner KYC & Background Verification	P0	4
M15	Partner Training & Certification	P0	5
M16	Partner Job Dispatch & On-Ground Execution	P0	6
M17	Partner Earnings, Payouts & Incentives	P0	5
M18	Partner Performance, Ratings & Quality Audit	P1	4
M19	Partner Support & SOS	P1	3

Inventory & Supply Chain Modules (1 module)

ID	Module Name	Priority	Requirements
M20	Consumable Kit & Inventory Management (SKU / Warehouse)	P0	6

Admin & Back-Office Modules (10 modules)

ID	Module Name	Priority	Requirements
M21	Role-Based Access Control & User Management	P0	3
M22	Service Catalog & SKU Master (Admin)	P0	3
M23	Pricing, Commission & Offer Configuration	P0	4
M24	Zone, Dispatch & Capacity Configuration	P0	4
M25	Partner Lifecycle Management (Admin)	P0	4
M26	CRM & Customer 360	P1	3
M27	Marketing & Campaign Management	P1	4
M28	Content Management System (CMS)	P1	3
M29	Financial Reconciliation & Payout Operations	P0	4
M30	MIS, Reporting & Business Intelligence	P0	12

Cross-Platform & Technical Modules (3 modules)

ID	Module Name	Priority	Requirements
M31	Notification Engine (Push / SMS / Email / WhatsApp)	P0	4
M32	Third-Party Integrations	P0	6
M33	Security, Data Privacy & Compliance	P0	5

7. Detailed Functional Requirements

Requirements are grouped by category below. Each module lists the key features / requirements the IT team should scope; the companion workbook breaks every line item down further with lifecycle stage and dependency notes.

7.1 Customer-Facing Modules

Platform: Customer Android App · Customer iOS App · Website

M01 — Customer Onboarding & Profile Management [P0]

Registration, login and profile management for end customers.

- **OTP / SSO login:** Sign-up and login via mobile OTP, email, and Google / Apple / Facebook SSO.
- **Profile setup:** Capture name, gender, date of birth and profile photo.
- **Multiple saved addresses:** Link one or more saved addresses to a single profile.
- **Preference capture:** Store language and partner-gender preference where relevant to a service.
- **Guest checkout:** Limited booking flow without full registration; convert to a full profile post-booking.
- **Account deletion & data export:** Self-serve account deletion and personal-data export for compliance.

M02 — Address & Location Management [P0]

Capture and validate service-delivery addresses and check serviceability.

- **Saved addresses:** Add, edit and delete multiple addresses tagged Home / Work / Other.
- **GPS auto-detect:** Auto-detect current location on app open for faster booking.
- **Map pin & address search:** Autocomplete address search plus manual map-pin drop.
- **Serviceability check:** Validate pincode/zone against live-city coverage before showing the catalog.
- **Default address:** Set and reuse a default address for repeat bookings.

M03 — Service Catalog, Search & Discovery [P0]

Browse, search and evaluate the salon & beauty service catalog.

- **Category browsing:** Browse by category: Hair, Skin & Face, Hair Removal, Nails, Makeup, Men's Grooming, Body Care, Packages.
- **Keyword search:** Search with auto-suggest across service names and categories.
- **Filter & sort:** Filter and sort results by price, rating, duration and popularity.
- **Service detail page:** Description, duration, price, add-ons, before/after images and reviews per service.
- **Package / bundle builder:** Configure bundled packages (e.g., bridal, party-ready) from individual services.
- **City/zone catalog variants:** Show only the services, pricing and availability applicable to the customer's zone.

M04 — Booking, Scheduling & Slot Management [P0]

The core booking flow, from slot selection to confirmation.

- **Real-time slot availability:** Live available slots by zone, date and time based on partner capacity.
- **Multi-service booking:** Book multiple services / add-ons in a single visit.
- **Instant vs scheduled booking:** Support both immediate on-demand booking and future-dated scheduling.
- **Preferred-partner selection:** Allow repeat customers to request the same partner where available.
- **Booking confirmation & ETA:** Confirm booking with partner-assignment status and estimated arrival window.
- **Calendar / reminder sync:** Add the booking to the device calendar with a reminder.

M05 — Cart, Pricing, Offers & Coupons [P0]

Transparent, upfront pricing — the platform's core trust differentiator.

- **Dynamic cart:** Line-item cart reflecting selected services, add-ons and quantities.
- **Coupon application:** Apply and validate coupon codes with eligibility and usage-limit checks.
- **Auto-applied discounts:** First-booking and referral discounts applied automatically where eligible.
- **Tax (GST) computation:** Compute and display applicable GST on the final price.
- **Price breakup transparency:** An itemized breakup shown before payment — no on-site renegotiation.

M06 — Payments, Wallet & Refunds [P0]

Cashless, secure payment collection and refund handling.

- **Multiple payment modes:** UPI, cards, net-banking and wallets at minimum; COD optional / limited.
- **In-app wallet:** Store credits, cashback and refund balances for future use.
- **Payment retry & failure handling:** A graceful retry flow and clear messaging on payment failure.
- **Auto-refund workflow:** Trigger refund-to-source or wallet-credit automatically on eligible cancellations.
- **GST-compliant invoicing:** Generate a downloadable invoice / receipt per booking.
- **Saved / tokenized payment methods:** Securely save cards / UPI handles for repeat use (PCI-DSS compliant).

M07 — Live Order Tracking [P1]

Real-time visibility into partner assignment and arrival.

- **Live partner location:** Show the partner's real-time location on a map from dispatch to arrival.
- **Booking status timeline:** Confirmed → Partner Assigned → En Route → Arrived → In Service → Completed.
- **ETA & delay alerts:** Display ETA and proactively notify the customer of delays.
- **Partner profile card:** Show partner photo, rating and verification badge before arrival.
- **Masked call / chat:** In-app masked-number call or chat with the assigned partner.

M08 — Ratings, Reviews & Feedback [P0]

The structured feedback loop that closes the accountability gap.

- **Mandatory post-service rating:** Prompt a star rating (and optional review) after every completed booking.
- **Structured feedback tags:** Tag feedback by hygiene, punctuality, skill and behaviour.
- **Photo upload with review:** Optional before/after photo attached to a review.
- **Review moderation queue:** Admin queue to moderate flagged reviews before publishing.

M09 — Membership & Subscription Plans [P1]

Recurring-revenue and retention plans.

- **Plan tiers:** Monthly / quarterly / annual tiers with defined benefits (priority slots, discounted pricing, bundled services).
- **Purchase & auto-renewal:** Subscribe to, auto-renew and cancel a plan in-app.
- **Entitlement usage tracking:** Track consumption of plan-included services against entitlement.
- **Plan-aware pricing:** Cart automatically reflects membership pricing/discount where applicable.

M10 — Loyalty, Referral & Rewards [P1]

Growth-loop mechanics for acquisition and retention.

- **Referral code & sharing:** Generate a unique referral code and shareable link/message.
- **Referral reward credit:** Credit both referrer and referee on the referee's successful first booking.
- **Loyalty points:** Accrue and redeem loyalty points against bookings.

- **Rebooking nudges:** Personalized push/SMS nudges timed to a service's typical rebooking cycle.

M11 — Customer Support, Complaints & SOS [P0]

The support and safety channel for customers.

- **Help center / FAQ:** Self-serve FAQ and help articles in-app.
- **Ticket raising:** Raise a support ticket categorized by billing, service quality, partner conduct or safety.
- **Live chat / chatbot:** First-line chatbot with escalation to a human agent.
- **In-app SOS:** Emergency SOS button sharing live location with ops / emergency contacts.
- **Complaint SLA tracking:** Track and surface resolution status and SLA against every open ticket.

M12 — Reschedule, Cancellation & Service Guarantee [P0]

Booking-change and quality-remediation workflows.

- **Self-serve reschedule:** Reschedule a booking within the configured policy window.
- **Tiered cancellation logic:** Apply cancellation-fee rules based on notice period.
- **Redo / service-guarantee claim:** Raise a claim for unsatisfactory service; routed to Admin for adjudication.
- **Guarantee-linked refund:** Auto-trigger a refund/credit or a free redo based on the claim outcome.

7.2 Partner-Facing Modules

Platform: Partner App (Android & iOS)

M13 — Partner Recruitment & Application [P0]

Top-of-funnel acquisition of beauty professionals.

- **Public recruitment landing page:** Web landing page for prospective partners to register interest.
- **In-app application form:** Capture skills, experience, service categories and location.
- **Application status tracking:** Show the applicant their status: Submitted / Under Review / Approved / Rejected.
- **Partner-refers-partner:** A referral mechanism for existing partners to refer new applicants.

M14 — Partner KYC & Background Verification [P0]

The trust and safety gate before any partner goes live.

- **Document upload:** Upload ID proof, address proof, photo and skill certificates.
- **Background-verification integration:** Submit to and retrieve results from a third-party ID / police-verification API.
- **Verification review queue:** Admin queue to review, approve or reject verification cases.
- **Re-verification reminders:** Scheduled reminders for periodic re-verification / renewal.

M15 — Partner Training & Certification [P0]

Standardized skill and hygiene-protocol certification.

- **Training content library:** Video / SOP modules per service category, managed centrally.
- **Certification test & scoring:** In-app assessment with pass/fail scoring gating go-live.
- **Hygiene-protocol certification:** Mandatory sealed single-use-kit protocol certification before the first booking.
- **Refresher / recertification:** Periodic recertification scheduling and tracking.
- **Training-fee payment:** Collect a paid-onboarding / upskilling fee where the business model requires it.

M16 — Partner Job Dispatch & On-Ground Execution [P0]

The core operational loop connecting demand to fulfilment.

- **Job push & accept/reject:** Push new bookings to the nearest qualified, available partner with an accept/reject window.
- **Zone-based auto-assignment:** Algorithm matching bookings to partners by zone, travel time and skill fit.
- **Navigation integration:** Turn-by-turn navigation to the customer's address.
- **Digital service checklist:** Step-by-step checklist including visible kit-unsealing confirmation and a before/after photo.
- **Job status updates:** Partner updates status: En Route / Arrived / Started / Completed.
- **Daily job queue view:** See and sequence all jobs scheduled for the day.

M17 — Partner Earnings, Payouts & Incentives [P0]

The financial engagement layer that drives partner retention.

- **Real-time earnings dashboard:** Per-job, daily and weekly earnings visible in the partner app.
- **Commission-tier logic:** Reduced commission for top-performing / high-retention partners.
- **Payout cycle & bank/UPI integration:** A configurable payout cycle (daily/weekly) with bank/UPI disbursal.
- **Incentive / bonus rule engine:** Volume-, rating- and referral-based bonus calculation.
- **Payout statements & tax docs:** Downloadable payout history and TDS documentation.

M18 — Partner Performance, Ratings & Quality Audit [P1]

The self-correcting feedback loop for service quality.

- **Partner scorecard:** An aggregate rating, completion rate, punctuality and hygiene-compliance score.
- **Mystery-shopper audit:** Admin-scheduled covert audits with structured scoring.
- **Strike & de-boarding workflow:** Log violations, apply strikes, and trigger de-boarding at a threshold.
- **Recognition / leaderboard:** Optional gamified recognition for top partners.

M19 — Partner Support & SOS [P1]

Two-way safety and support — protecting the partner, not just the customer.

- **Partner help center & ticketing:** Self-serve help and ticket-raising for partners.
- **In-app SOS for partners:** An emergency alert from the partner side while inside a customer's home.
- **Dispute resolution:** A structured workflow for payment disputes and customer-conduct complaints.

7.3 Inventory & Supply Chain Modules

Platform: Partner App + Admin Web Console

M20 — Consumable Kit & Inventory Management (SKU / Warehouse) [P0]

SKU-level tracking of consumable kits and private-label retail products — directly supports the profitability and inventory MIS the business needs.

- **SKU master:** Master list of consumable-kit SKUs and private-label retail-product SKUs, with unit cost and category.
- **Central warehouse stock tracking:** Track stock-on-hand per SKU per warehouse/zone with reorder-point alerts.
- **Kit request workflow:** Partner requests kit replenishment in-app; ops fulfils and dispatches.
- **Per-booking kit consumption log:** Log the specific SKU(s) consumed against each booking ID for true per-booking cost.
- **Private-label product catalog:** A catalog of proprietary skincare/haircare products sold direct-to-consumer during bookings.
- **Expiry & batch tracking:** Track batch numbers and expiry dates for consumables.

7.4 Admin & Back-Office Modules

Platform: Admin Web Console

M21 — Role-Based Access Control & User Management [P0]*Secure, permissioned access to the back office.*

- **Admin user creation:** Create admin users with role-based permissions (Ops, Finance, Marketing, Quality, Super-Admin).
- **Audit log:** An immutable log of all admin actions for accountability.
- **SSO / 2FA for admin login:** Enforce two-factor authentication for all back-office logins.

M22 — Service Catalog & SKU Master (Admin) [P0]*Central authoring of the customer-facing service catalog.*

- **Service / category CRUD:** Create, edit and deactivate services, categories, add-ons and packages.
- **Zone-wise pricing override:** Override price / availability by city or zone.
- **Service-to-training linkage:** Link each service to its required training / SOP module.

M23 — Pricing, Commission & Offer Configuration [P0]*Central control of the platform's monetization levers.*

- **AOV / price configuration:** Set price per service per zone.
- **Commission-tier rules:** Configure commission percentage tiers by partner performance.
- **Coupon / offer creation:** Create coupons with validity, usage limits and eligibility rules.
- **Membership plan configuration:** Define subscription tiers, pricing and entitlements.

M24 — Zone, Dispatch & Capacity Configuration [P0]*Operational configuration for the hub-and-spoke fulfilment model.*

- **City / zone mapping:** Define serviceable zones and their boundaries.
- **Auto-assignment parameters:** Configure matching radius, max travel time and load-balancing rules.
- **Slot / capacity configuration:** Set bookable slot capacity per zone per time-band.
- **Manual reassignment tool:** An ops override to manually reassign a booking to a different partner.

M25 — Partner Lifecycle Management (Admin) [P0]*The back-office view and control over the full partner base.*

- **Partner directory:** A searchable directory with full profile, documents, status and history.
- **Bulk onboarding tools:** Bulk-upload / onboard partners for new city launches.
- **De-boarding / reactivation:** A workflow to de-board a partner and, where eligible, reactivate.
- **Partner broadcast tool:** Send announcements/updates to all or segmented partners.

M26 — CRM & Customer 360 [P1]*A unified view of the customer relationship for support and marketing.*

- **Unified customer profile:** A single view of bookings, payments, tickets and feedback history.
- **Customer segmentation:** Segment customers for targeted support and marketing.
- **Customer lifetime value view:** Surface CLV per customer / segment to inform retention spend.

M27 — Marketing & Campaign Management [P1]*Demand-generation tooling for the growth team.*

- **Campaign builder & scheduler:** Build and schedule push / SMS / email campaigns.
- **Geo-targeted promotions:** Target promotions by zone / city.

- **Referral-program configuration:** Configure referral reward values and rules.
- **Campaign ROI tracking:** Track spend, conversion and ROI per campaign.

M28 — Content Management System (CMS) [P1]

Non-technical content control for the website and app.

- **Banner / content management:** Manage homepage banners and promotional content across app and website.
- **Blog / SEO publishing:** Publish SEO content on the public website.
- **Legal pages management:** Manage Terms & Conditions, Privacy Policy and Refund Policy pages.

M29 — Financial Reconciliation & Payout Operations [P0]

Back-office finance operations tying payments to the ledger.

- **Payment-gateway settlement reconciliation:** Reconcile gateway settlements against booking records daily.
- **Partner payout batch processing:** Batch-process and approve partner payouts per cycle.
- **Refund / credit reconciliation:** Reconcile refunds and wallet credits issued against source transactions.
- **GST / tax reporting exports:** Export GST and other statutory reports for filing.

M30 — MIS, Reporting & Business Intelligence [P0]

The full management-information layer — covered in detail in Section 8, given its importance to this build.

- **Executive dashboard:** Bookings, revenue, GMV, active partners and active customers at a glance.
- **Profitability / contribution-margin report:** Contribution margin per booking, zone, service category and partner, net of kit cost and commission.
- **Inventory & SKU report:** Stock levels, consumption rate, reorder alerts and total active SKU count by category.
- **Partner utilization & payout report:** Bookings per partner, idle time and payout totals by period.
- **Customer cohort, retention & churn report:** Cohort-based retention and churn tracking.
- **Marketing campaign ROI / CAC report:** Cost-per-acquisition and campaign ROI.
- **Membership & subscription report:** Active members, renewal rate and plan-wise revenue.
- **Cancellation, refund & guarantee report:** Cancellation rate, refund value and service-guarantee claim trends.
- **Quality & complaint report:** Strike trends, audit scores and complaint-resolution SLAs.
- **Cash-flow & finance reconciliation report:** Daily / weekly cash position reconciled against the ledger.
- **Custom report builder & scheduled export:** An ad-hoc report builder with CSV / Excel / PDF export and scheduled email delivery.
- **Role-based dashboard views:** Separate dashboard views for Ops, Finance, Marketing and Quality roles.

7.5 Cross-Platform & Technical Modules

Platform: Shared Backend — all platforms

M31 — Notification Engine (Push / SMS / Email / WhatsApp) [P0]

The shared communication backbone used by every customer- and partner-facing flow.

- **Unified notification service:** A single service abstracting push, SMS, email and WhatsApp Business API sends.
- **Template management:** Admin-configurable message templates per event type.
- **Transactional notifications:** Booking confirmation, partner assigned, payment, reminders, and so on.
- **Marketing / broadcast notifications:** Opt-in-managed promotional and campaign notifications.

M32 — Third-Party Integrations [P0]

The external services the platform depends on.

- **Payment gateway:** A PCI-DSS-compliant payment gateway (e.g., Razorpay / PayU) for collections and payouts.
- **Maps & geolocation:** Google Maps (or equivalent) for address search, navigation and live tracking.
- **SMS / WhatsApp / email providers:** Messaging providers for the Notification Engine.
- **Background-verification API:** A third-party ID / police-verification vendor for partner KYC.
- **Analytics & BI tooling:** A product-analytics tool (e.g., Mixpanel / Amplitude) and a BI tool (e.g., Power BI / Looker) for MIS.
- **Push notification service:** FCM (Android) and APNs (iOS) integration.

M33 — Security, Data Privacy & Compliance [P0]

Non-negotiable platform-wide controls, treated as a first-class module rather than an afterthought.

- **Encryption in-transit & at-rest:** TLS for all traffic; encryption at rest for PII and payment data.
- **PCI-DSS compliance:** Payment-data handling compliant with PCI-DSS scope requirements.
- **DPDP Act compliance:** Consent management and data-subject rights (access/delete) per India's Digital Personal Data Protection Act.
- **Role-based data access & audit trail:** Restrict data visibility by role; log all access to sensitive records.
- **Background-verification data handling:** A defined retention and access policy for partner verification documents.

8. MIS & Reporting Requirements

Given how central reporting is to this build, MIS requirements (module M30) are restated here with intended audience and frequency, in addition to the module listing in Section 7.

Report / Dashboard	Description	Primary Consumer	Frequency
Executive Dashboard	Bookings, revenue, GMV, active partners and active customers at a glance.	Leadership / Admin	Real-time
Profitability / Contribution-Margin Report	Margin per booking, zone, service and partner, net of kit cost and commission.	Finance / Leadership	Daily / Monthly
Inventory & SKU Report	Stock levels, consumption rate, reorder alerts and total active SKU count by category.	Ops / Supply Chain	Daily
Partner Utilization & Payout Report	Bookings per partner, idle time and payout totals by period.	Ops / Finance	Weekly
Customer Cohort, Retention & Churn Report	Cohort-based retention and churn tracking.	Marketing / Leadership	Monthly
Marketing Campaign ROI / CAC Report	Cost-per-acquisition and campaign ROI.	Marketing	Per campaign
Membership & Subscription Report	Active members, renewal rate and plan-wise revenue.	Finance / Marketing	Monthly
Cancellation, Refund & Guarantee Report	Cancellation rate, refund value and service-guarantee claim trends.	Ops / Quality	Weekly
Quality & Complaint Report	Strike trends, audit scores and complaint-resolution SLAs.	Quality / Ops	Weekly
Cash-Flow & Finance Reconciliation Report	Daily/weekly cash position reconciled against the ledger.	Finance	Daily
Custom Report Builder & Scheduled Export	Ad-hoc report builder with CSV/Excel/PDF export and scheduled email delivery.	All roles (RBAC)	On demand

9. Non-Functional Requirements

Category	Requirement
Performance	App cold-start under 3 seconds; booking-flow screens under 2 seconds on a 4G connection.
Scalability	Backend must scale from single-city launch volumes to a multi-city, multi-thousand-booking-per-day load without re-architecture.
Availability	Target 99.9% uptime for booking and payment-critical services; planned maintenance windows communicated in advance.
Security & Compliance	Per Module M33: encryption in-transit/at-rest, PCI-DSS scope for payments, and DPDP Act compliance for personal data.
Localization	English and Hindi language support at launch across all customer-facing surfaces; partner app to follow the same standard.
Accessibility	WCAG 2.1 AA baseline for the website; standard mobile accessibility (screen-reader labels, tap-target sizing) for both apps.
Device / Browser Support	Android 9+ and iOS 15+ for native apps; latest two major versions of Chrome, Safari and Edge for the website.
Observability & Monitoring	Centralized logging, crash reporting and uptime/performance monitoring across all services from day one.

10. Integration Requirements

Integration	Purpose	Notes
Payment Gateway	Payment collection, partner payouts and refunds.	Must be PCI-DSS compliant (e.g., Razorpay, PayU, or equivalent).
Maps & Geolocation	Address search, navigation and live partner tracking.	Google Maps Platform or equivalent.
SMS / WhatsApp / Email	Transactional and marketing notifications.	Feeds the shared Notification Engine (M31).
Background-Verification API	ID and police verification for partner KYC.	Third-party verification vendor; feeds M14.
Analytics & BI Tooling	Product analytics and business-intelligence reporting.	E.g., Mixpanel/Amplitude for product; Power BI/Looker for MIS.
Push Notification Services	Mobile push delivery.	FCM for Android, APNs for iOS.

11. Assumptions & Dependencies

- Launch is single-city (as reflected in the Zone & Dispatch configuration in Module M24), with multi-city expansion supported architecturally but not required for MVP.
- The commission-based, private-label-product and training-fee revenue streams referenced across Modules M17, M20 and M23 are confirmed by the business team before pricing/commission logic is finalized.
- A third-party background-verification vendor and a payment gateway will be selected and contracted before Module M14 and M06/M32 build begins, respectively.
- Content for training modules (M15) and legal/policy pages (M28) will be supplied by the business/legal team; engineering builds the delivery mechanism, not the content itself.

12. Out of Scope for Now & Next Steps

As noted in Section 2.2, detailed user workflows — how a customer moves screen-to-screen through discovery, booking, tracking and rating; how a partner moves through recruitment, training and job execution; and how an administrator moves through configuration and reporting — are intentionally not documented here.

Once this module structure is reviewed and agreed with the IT team, the next step is a dedicated user-workflow and journey-mapping exercise for each persona, covering screen flows, wireframes and edge-case handling, ahead of detailed sprint planning.

13. Appendix A: Glossary

Term	Meaning
AOV	Average Order Value — the average value of a single booking.
SKU	Stock-Keeping Unit — a unique identifier for a distinct consumable-kit or retail-product item.
KYC	Know Your Customer — here, the identity and background verification applied to partners.
SOS	An in-app emergency alert triggered by a customer or partner.
MIS	Management Information System — the platform's reporting and dashboard layer.
RBAC	Role-Based Access Control — restricting system access by a user's assigned role.
GMV	Gross Merchandise Value — the total value of bookings transacted through the platform.
CAC	Customer Acquisition Cost.
CLV	Customer Lifetime Value.
TDS	Tax Deducted at Source — applicable to partner payouts under Indian tax law.
DPDP Act	India's Digital Personal Data Protection Act — governs personal-data handling and consent.
PCI-DSS	Payment Card Industry Data Security Standard — governs secure handling of card payment data.

14. Appendix B: Companion Workbook

A companion Excel workbook, [Bloom_Salon_Platform_Module_Requirements.xlsx](#), accompanies this document. It contains:

- An Executive Summary sheet listing all 33 modules with category, persona, platform, priority and a live count of requirements per module.
- A Detailed Requirements sheet with all 156 task-level requirements, each tagged with persona, platform, lifecycle stage, priority and dependency notes — intended for direct use in backlog creation and sprint estimation.
